

Let's go! Healthy and sustainable on the go with Emsa

Made
in
Germany

Whether in the lunch break in the office, between two appointments or on the way to sport – we spend a large part of the day on the go. What often falls by the wayside: a healthy break meal. Food-to-go is available at every corner, but it's not always very nutritional. So why not prepare your meal at home and take it with you? With the practical **CLIP & GO fresh food containers** from Emsa this is very easy. The range offers the right solution for every type of meal. Prepared at home and 100% leak-proof thanks to the Emsa freshness seal, your favourite muesli, snacks, salads and sandwiches can be eaten crisp and fresh anytime and anywhere.

Another advantage of meal prepping: The self-prepared food is not only healthier than convenience food, but also protects the environment. Because if you do without packed sandwiches and salads from the supermarket, you avoid a lot of waste. This makes healthy nutrition easy while on the go – let's go.

Breakfast – all day long

Brunch is all the rage – the sophisticated **CLIP & GO Brunchbox** is just the thing. Thanks to the unique Emsa freshness seal, your favourite sandwich remains tasty even in the afternoon and the mesh insert in the box allows you to easily create a second level. The extra insert for small snacks contains sweet grapes, crunchy carrots and the like. If you fancy a classic English sandwich for a break brunch, the **CLIP & GO sandwich box** will simply delight you. The ingenious triangular insert divides the can into two halves and, in addition to the sandwich, there is room for fruit and vegetables, for example, without the bread becoming soft.

Lunchtime: This is how you keep everything fresh

The **lunchbox** from the **CLIP & GO** series is perfect for all those who prefer a real lunch: Thanks to three different inserts, vegetables, meat, rice and noodles can be transported perfectly separated from each other. During the break, the food can be warmed up in the microwave directly in the box and then enjoyed from the integrated plate. And for those who prefer a salad for lunch: In the **CLIP & GO Saladbox** no green leaf gets mushy. The separate inserts for toppings and dressing keep everything fresh and crunchy until eaten.

Mixed in no time

Yoghurt with fresh fruits and muesli always tastes good. Even mixed with the natural variant and fresh fruits, your self-made creation is also much healthier than the sweetened fruit yoghurt from supermarket shelves. The **Yoghurtbox** from the **CLIP & GO series** with the practical folding corner makes it possible to transport the ingredients separately until they are eaten and then mix them in no time at all. And not only yoghurt and muesli can be taken along in the box: Even small snacks such as vegetable sticks with dip find their perfect place in it.

Chic thirst quenchers that stay shut

Not just food, but also beverages need to be transported safely: With the Drink2Go series Emsa offers the perfect drinking bottles for on the go. Visually pleasing and easy to refill – this saves disposable plastic bottles and is good for the environment. The **Drink2Go TRITAN** bottles with their elegant appearance combined with the advantages of plastic make drinking is twice as much fun. The cheerful, colourful decors add colour to everyday life – so you certainly won't forget to reach for your regular bottle of water. Due to the light and also break-proof material, **TRITAN** bottles are ideal for on the go and quickly stowed away in every bag. Depending on the intended use, two sealing techniques can be selected, which are even leak-proof with carbonated beverages. If you want to spice up your water a little more, just add a few slices of orange or lemon to the bottles, which ensures a deliciously light aroma.
