

No more dry spells in summer: let your plants take care of themselves!

Make your plants self-sufficient in the holiday season with Emsa

We've all been there. When the summer holidays are just around the corner and it's time to get away with the family, sooner or later we find ourselves asking who will look after our beloved indoor and outdoor plants. But now the answer is clear: Emsa! The smart Aqua Plus and Aqua Comfort watering systems let your plants take care of themselves over long periods of time. With your grandparents, best friends and colleagues off the hook, there's nothing left to stand between you and a carefree trip!

Farewell, dry spells – with the Aqua Plus watering system

What sits on balcony railings like a king and makes life better for plants? The City railing pot, of course! Complete with proven Aqua Plus watering system, it allows plants to supply themselves with exactly the amount of water they need. But how does it work? The railing pot contains a drainage plate to prevent waterlogging, a large water reservoir and special padding. The plants are watered according to the wick principle: the plants take all the water they need from the tank via the padding. It's a real godsend for anyone who is reluctant to hand over the responsibility for their precious green foliage, especially when the sun comes out and temperatures start to soar.

- **City railing pot with Aqua Plus watering system**, 30 x 30 cm (11.81 x 11.81 in.) and 50 x 50 cm (19.69 x 19.69 in.) white, dusty grey, granite, green and (**new!**) silk grey, terracotta, pink

Graced by green – even when there's nobody to water the plants

Thanks to the Aqua Comfort watering system, Emsa is now giving all plant and holiday lovers out there even more freedom! This practical device works according to the same wick principle as Aqua Plus. But there's one small, impressive difference: it features a water level indicator with a filling chamber so you can clearly see how much water is needed at any time. The perfect homecoming solution: as soon as you get back, you can check how thirsty your lush green foliage is or how much water there is

left in the plant pot. When fitted with this high-end watering system, planters such as the Casa Mesh window boxes offer ultimate convenience and are sure to turn heads. You'll be happier than ever to get back to your own house when the holiday is over!

- **Casa Mesh window box with Aqua Plus watering system**, 50 x 20 x 18 cm (19.68 x 7.87 x 7.09 in.) and 75 x 20 x 18 cm (29.53 x 7.87 x 7.09 in.), colours: white, granite, mocha and **(new!)** quartz grey

Holiday cover for living rooms and gardens: leave it to Aqua Comfort

Even when they're inside your home, plants are bothered by sun and high temperatures. The Casa Brilliant flower pots and Casa Matt tall planters are here to save the day with the Aqua Comfort water level indicator. Those green plants you care for so dearly and your favourite, proudly blooming specimens will be watered perfectly even when you're away – and they can wait until you're ready to give them some personal attention when you're back!

Summer plants: expert tips!

Pflanzenfreude.de – an initiative from Blumenbüro Holland – is teaching consumers how much more enjoyable life can be in the company of plants. The experts reveal all in cooperation with Emsa:

- *Being the true summer plants they are, echinacea, phlox and larkspur prefer a place in the sun but will also develop their sumptuous, invigorating blossoms in partial shade. A sheltered spot with loamy and sandy soil is where they are happiest.*
- *Summer-flowering plant pot bulbs: summer-flowing bulbs, such as calla, lily, star of Bethlehem, are equally happy in shaded areas and in sunlight. The only important thing to bear in mind is that the soil around the bulbs mustn't dry out, so you should make sure you plan to water them regularly. But as they are also good at storing moisture, the bulbs can cope with shorter dry periods if they have to.*
- *Our tip for balconies: begonias are very undemanding balcony plants and were recently named the balcony plant of the year 2017.*
