

Cool drinks served with style – Flow Bottle and Flow Classic cooling carafes

Drinks served with style

Whether it's at the family dining table, the office or a banquet, drinks are always more enjoyable when they're served in an elegant carafe. But the beautifully-formed Flow Bottle and Flow Classic hand-blown glass carafes from Emsa don't just look good: thanks to the integrated cooling element in stainless steel réchaud, they also keep water, juice, ice tea, health drinks and wine reliably cold without watering them down. Simply keep the cooling element in the freezer and use it in the base of the carafe as required. The practical glass carafe also fits into all standard refrigerator doors. What's more, the comfort serving spout is guaranteed to provide drip-free pouring, while the automatic closure is designed to provide optimum protection for the contents. All of this means you can now enjoy your refreshments served at the perfect temperature and in elegant style at any time.

Flow Bottle and Flow Classic product characteristics:

- High-quality combination of hand-blown glass and brushed stainless steel
- Integrated cooling element for optimum cooling performance
- Glass carafe fits into all standard refrigerator doors
- Includes comfort serving spout for non-drip pouring
- Automatic closure opens and closes automatically when pouring
- Also provides optimum protection from insects
- Size: 1.0 L (33.82 fl. oz.)
- Material: glass/stainless steel
- Available from all household goods stores from September
